

Exhaustive Concordance to the Greek New Testament, The

For Greek students, scholars, instructors, and others whose use of the language goes beyond the rudimentary, The Exhaustive Concordance to the Greek New Testament supplies an exhaustive index to every Greek word found in the New Testament. This concordance is based on the fourth edition of the United Bible Societies Greek New Testament (UBS4). Features: * Context lines have been adjusted to provide meaningful units. The length of each context line has been determined by the need for meaningful contexts. Many contexts are two lines long. * Frequency counts are included for each word. * Hundreds of frequently occurring phrases are noted. * Every word in the Goodrick/Kohlenberger numbering system has its own entry--even variants that do not occur in UBS4 are noted as variant readings and defined. * All NIV variants are noted, making this an exhaustive concordance to UBS4 as well as the Greek text behind the NIV. * All cognate relationships within the New Testament are shown. * The definite article and a handful of conjunctions and particles are indexed without context lines.
