

Introduction to Financial Accounting in Hong Kong

Introduction to Financial Accounting in Hong Kong is a well-established text that uses a fine balance of theory and application to comprehensively introduce the key topics covered in introductory financial accounting courses in Hong Kong Universities. This student-friendly textbook has 34 manageable chapters based around clearly set learning objectives. -- Learning Features Each chapter features an extensive range of worked examples to illustrate the theory and practice. In addition, learning activities, exercises and graded review questions offer multiple ways for students to evaluate their learning. Key terms, figures, tables and bulleted lists highlight the critical learning points in the text. -- Case Studies This book includes a set of four case studies that can be used both for self-study and for taught classes. The cases illustrate real-life implications and contexts, and explore issues related to sole trader accounts, company accounts and incomplete records.
