

Scientist and Puzzle Solver, Constance Tom Noguchi (American Women in Science Biography)

Connie was a baby when she and her family came to America from China. As a little girl with an inquiring mind and the energy to always try one more thing, she studied ballet, learned to twirl a baton, and grew up to marry, have a family, and earn a Ph.D. in theoretical nuclear physics. Her breakthrough research on sickle cell anemia solved part of the puzzle on that disease that had long baffled other scientists.
