

Everglades National Park (Road Trip)

Everglades National Park was established in 1934 to protect one of the most unique ecosystems in the world. From hardwood forests to the estuarine habitat of Florida Bay, the many habitats in the park are home to about 1,000 species of plants and hundreds of Animalspecies, some of which are endangered. Readers learn the parks history and roots in conservation through the social studies and science content included in the main text. Colorful photographs show the parks beauty up close, enhancing reader interest through the rare and fascinating flora and fauna of the Everglades.
