

## Winter Moon (Seasons of the Moon)

Under the winter moon: Survive an icy night under a December moon with a song sparrow stalked by a midnight predator in Ohio's suburban meadowland. Navigate through underground passageways with a mole in the chilly darkness of December and January beneath the Great Plains of Kansas. Experience January moonlit courtship with a hooting horned owl in the forests of the Catskill Mountains. Prepare for hibernation with a female bear as February's ice crystals replace the dew in the Smoky Mountains of Tennessee. In this series, acclaimed naturalist and Newbery Medal -- winning author Jean Craighead George takes readers on a wondrous journey through each season of the year as she captures the lives of thirteen different North American animals in their natural habitats.
